COT 4521-001: Introduction to Computational Geometry (Fall 2019)

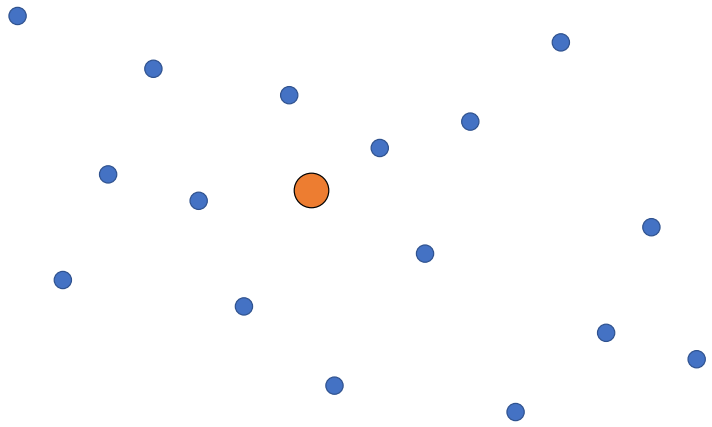
Worksheet 8

1 Ground Rules

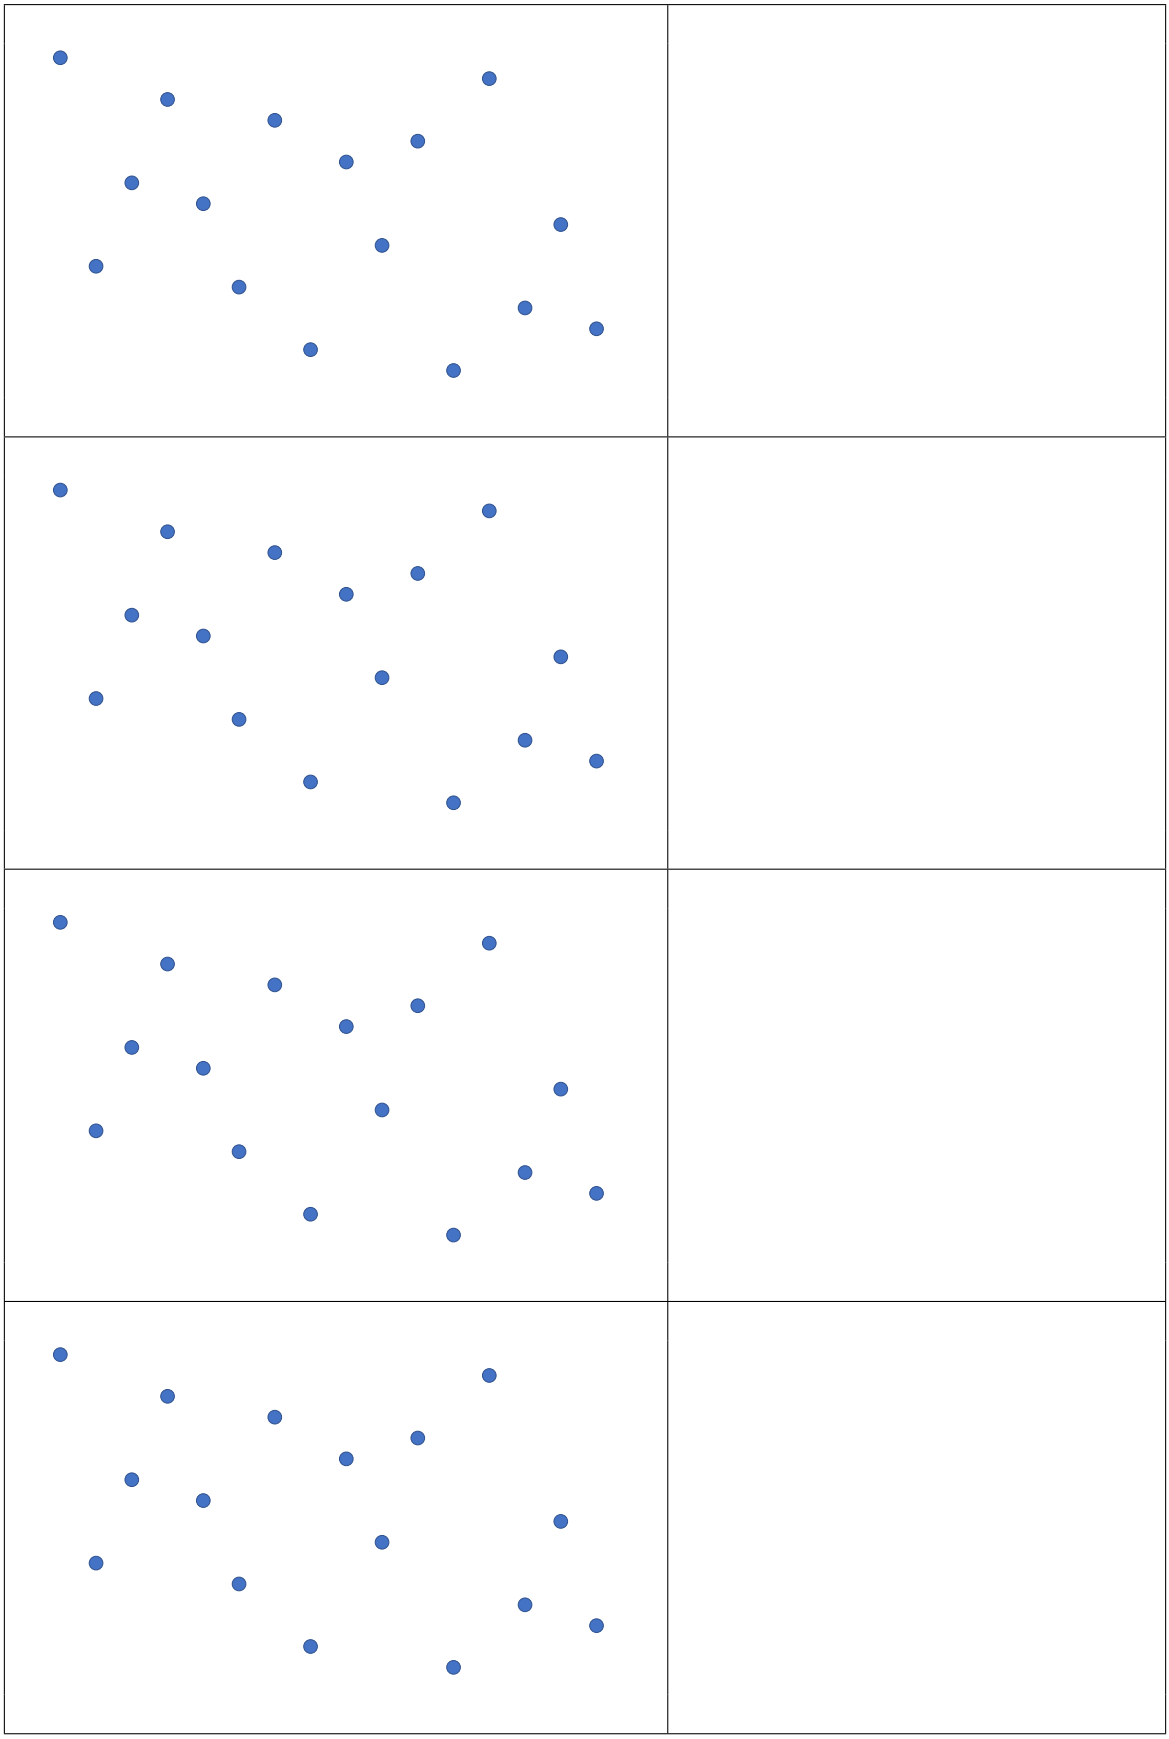
This assignment is intended to be done alone. You may ask others for high-level help. However, the answer must be yours. For all questions we expect you to show yours work!

2 Assignment

- For the following point set in blue, find perform spatial subdivision using a: grid (4×4); quadtree; and kd-tree. Show the algorithm using the following pages. Be sure to show all of the steps and the order of steps for the algorithm (show both the division and resulting tree). The trees have a height of 4 (i.e., 3 levels of subdivision).



- For each algorithm, show the search path through the tree searching for the point nearest to the orange one.

3 Submission


Upload your answers and associated work to canvas as a single scanned, typed, or photographed PDF document. Be sure that your submission is legible.
